

**BONEFISH & TARPON TRUST**  
STEWARDSHIP THROUGH SCIENCE

## **Abaco Bonefish Roundup**

Are you looking for a unique opportunity to catch bonefish, learn more about bonefish, and protect the future of bonefish at the same time? The Abaco Bonefish Roundup, to be held during the week of October 17<sup>th</sup> through the 23<sup>rd</sup> provides just that. Anglers who want to spend from 3 to 6 days fishing and participating in this special research event will be rewarded with great memories and the knowledge that they have made a difference.

Bonefish and Tarpon Trust is seeking anglers to help us to learn more about the Abaco bonefish population and their spawning patterns.

During this event we plan to tag hundreds of bonefish with “spaghetti tags” to allow us to follow their growth and migrations, and also to implant more than 20 fish with sonic tags that will allow us to track them as they undertake their spawning migrations. Knowing which locations the bonefish use to spawn will help to protect these areas for the future. By tagging and tracking as many fish as possible, we can understand their movements and growth patterns, which will provide information that will help conserve and even enhance this amazing fishery.

BTT scientists will be on hand to guide and conduct the research and to answer questions from anglers about bonefish research and conservation.
